System

DIVE INTO  
**GROW IMS**  
MODULES  
DETAILS

**MODULES**

# Product Information Management

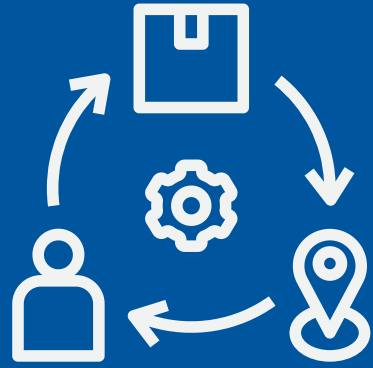

- Database of all products in inventory
- Product details such as name, description, SKU, and pricing
- Categorization and classification of products

**MODULES**

# Inventory Tracking

- Real-time tracking of stock levels
- Barcode or RFID scanning for accurate inventory counts
- Serialized inventory tracking for individual items

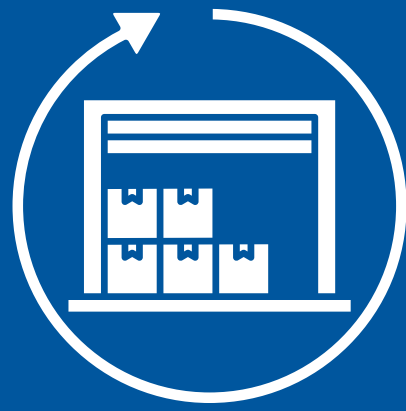

**MODULES**

# Order Management

- Creation of purchase orders
- Order fulfillment and tracking
- Integration with sales and procurement systems

**MODULES**

# Stock Replenishment

- Automatic reorder point calculation
- Generation of stock replenishment orders
- Supplier collaboration for timely restocking

Inventory  
Management  
System

**MODULES**

# Warehouse Management

- Efficient storage and retrieval processes
- Bin location management
- Inventory transfer between warehouses

**Inventory  
Management  
System**

**MODULES**

# Demand Forecasting

- Analysis of historical data for demand forecasting
- Prediction of future demand patterns
- Collaboration with sales and marketing teams

## MODULES

# Reporting and Analytics

- Reports on inventory levels, stockouts, and overstock

- Dashboards for real-time visibility

Inventory  
Management  
System

**MODULES**

# Inventory Valuation

- Methods for calculating the value of inventory (FIFO, LIFO, Weighted Average)
- Valuation reports for financial purposes

Inventory  
Management  
System

**MODULES**

# Returns Management

- Handling returns and processing refunds or replacements
- Restocking returned items into inventory
- Documentation for returned products

**Inventory  
Management  
System**

**MODULES**

# ABC Analysis

- Classification of inventory items based on importance
- Differentiated control and management based on item classification

**MODULES**

# Multi-location Inventory Management

- Management of inventory across multiple locations or warehouses
- Centralized or decentralized control options
- Inter-location inventory transfers

Inventory  
Management  
System

**MODULES**

# User Authentication and Access Control

- User accounts for authentication
- Role-based access control for security
- Limited access for specific user roles

**Inventory  
Management  
System**

**MODULES**

# Integration with eCommerce Platforms

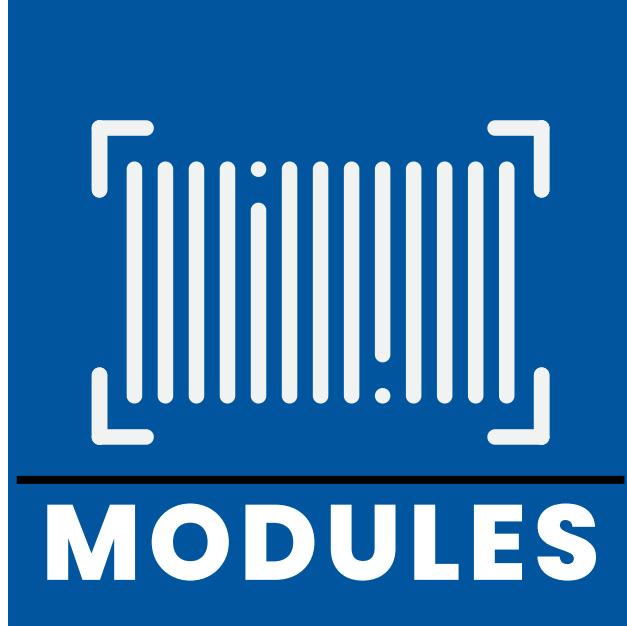

- Integration with point-of-sale (POS) systems
- Integration with online sales platforms
- Seamless data exchange with sales channels

**MODULES**

# Landed Cost Calculation

- Calculation of total cost of inventory, including shipping and customs
- Accurate cost allocation to items in stock

# Batch and Serial Number Tracking

- Tracking inventory by batches or lots
- Management of serialized items
- Traceability of items back to their origin

# ADVANTAGES OF PARTNERING WITH US . . .

**Customizable  
Module**

**One Decade  
Experience**

**Advanced Data  
Security**

**Dedicated  
Support**
